

Welcome to the Qualtrics XM Extension SDK

Our mission is to enable you to integrate the XM Platform with external systems in ways that add value to our joint customers. We call these integrations XM Extensions.

The Extension SDK provides the tooling, runtime, and documentation to help you successfully create and manage your XM Extensions.

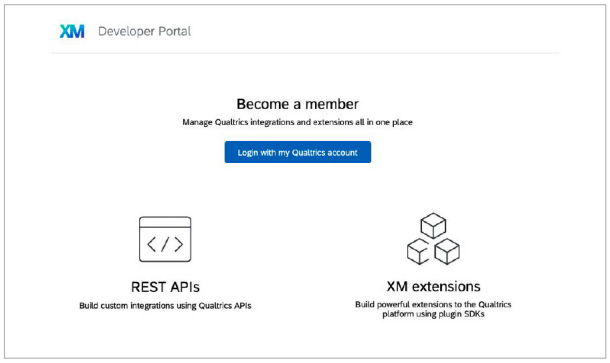

These steps will guide you through how to get started:

Step 1: Login

In a modern browser of your choice, navigate to the Qualtrics Developer Portal at *https://developer.qualtrics.com*

If you already have a Qualtrics account, then click the Login with my Qualtrics account blue button. If you are unsure whether you have a Qualtrics account, then reach out to the Qualtrics point-of-contact for your company.

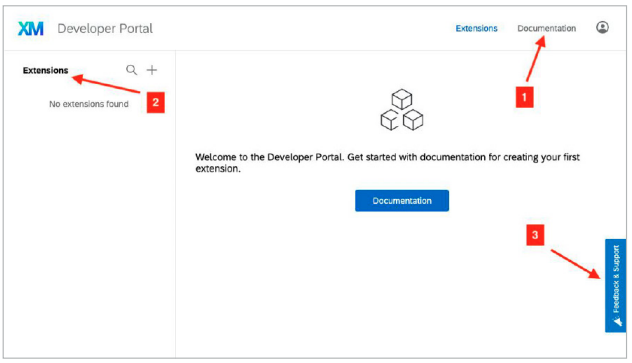

You will need to review and agree to the Terms of Service, and upon confirmation the Developer Portal page opens.

Qualtrics CoreXM™

Step 2: Explore

The Qualtrics Developer Portal:

Highlighted above by red numbers and arrows are key areas explained below:

01 Documentation

Guides, API reference docs, and sample code reside in the Documentation section. You can access the Documentation by clicking either:

+ The gray Documentation link in the top right navigation bar
+ The blue Documentation button displayed in the center of the page (only present when you do not yet have any Extensions created).

This documentation contains the instructions you need to create, publish, and maintain your XM Extension.

02 Extensions

Once you create one or more XM Extensions, they appear in the left navigation pane. Clicking an extension link displays its details in the main content area.

03 Feedback

Click on the blue Feedback & Support button when you want to:

+ Ask questions
+ Report issues
+ Request new features
+ Provide feedback

After you submit the form, a member of our developer advocacy team will review your request and get in touch with you on next steps.

Step 3: Build

You are now ready to build your first XM Extension!

We're excited to see what you build, and we are available to support you via the Feedback & Support button.
